

Experimental Course Outline Deletion Process

1. Experimental courses must be converted and assigned a non-experimental number within two years by submitting a new course outline proposal in Curriculum Central.
2. In the semester before the end of the two-year time limit, the Curriculum Committee Chair will notify the appropriate Division Chair and the Banner Officer about the specific date that the experimental course will be deleted from Curriculum Central.
3. To start the experimental course deletion process, click **Courses**, click **Delete Approved Outline**, select the outline, and choose the **Experimental Course Deletion** routing (not the division routing).

The curriculum experimental outline deletion chain:

◆ DC (notification only) => CC Chair
