

Canon N100 Digital Still Camera Specifications

Manufacture: Canon
Model: N100

Features:

Dual Capture

A special moment is more than a simple photo or a video - it's the story behind the moment that gives the memory meaning. So capture it with the innovative PowerShot N100 and its rear-facing "Story Camera." The PowerShot N100 uses the secondary camera to turn your photos or video into a compelling story with behind-the-scenes input. In Dual Capture mode, the main camera shoots the subject while the photographer's expression is captured with a wide-angle 25mm lens sub-camera to preserve the moment with an entirely new feel. It's perfect for capturing everything from a parent's pride to a priceless double take. The images are combined in a single file for a fun picture-in-picture effect in both photos and video, and with three sizes and four positions available for the sub-shot, there is plenty of flexibility for creating the perfect story for the moment.

Story Highlights

View your still images and video† as a fun short story with the Story Highlights feature on the new PowerShot N100 camera. You can choose to have the camera create one automatically, creating a short video of approximately two minutes according to date, event or people, or you can customize your Story Highlights reel for a fun, unique video of up to five minutes. It's all done in camera, without the need for any additional software. Easily access and enjoy your Story Highlights - simply press the Story Highlights button to start creating your highlight album. The Story Highlights album can be saved to the camera for quick replay and also shared with the PowerShot N100's built-in Wi-Fi®.

Built-in Wi-Fi® makes sharing quick and easy

The PowerShot N100 camera is equipped with built-in Wi-Fi® technology so you can easily share your creative photos and video with friends and family. The camera can connect directly to both iOS® and Android™ devices*, and upload images via the free Canon CameraWindow app** without a computer. Easily post your images to social networking and media sites - Facebook®, Twitter®, YouTube™, Flickr® and now Google Drive™ - through CANON iMAGE GATEWAY# or save them to the online photo album to share anytime, anywhere. You can share your images with everyone or to selected groups, and even add comments. The built-in Wi-Fi® technology allows you to transfer images to other Wi-Fi® equipped PowerShot cameras or print your photos directly to a PictBridge (Wireless LAN) certified printer. You can also use your smartphone or tablet* to remotely control the camera with Remote Shooting**. Your device will show a live image of the camera's capture - perfect for a commemorative group photo, wildlife shots and all kinds of situations.

Built-in NFC (Near Field Communication)

The PowerShot N100 camera supports NFC (Near Field Communication) technology, eliminating the need to find and open the Canon CameraWindow app* on your mobile device. Simply touch the NFC icon on your camera to your compatible Android device**, and the CameraWindow app will launch

The EMC inspires, facilitates, and supports teaching and learning using technology.

automatically for quick, easy sharing of your images. Built-in NFC technology also makes it simpler to install the app. If the app hasn't been installed yet, once you touch the devices together for the first time, the download screen will display automatically.
